

Produce Stand

Here is a graph showing the number of Valencia Oranges on display at a produce stand, over the course of a morning.

1. a. Based on the graph, what do you think happened at 8:00 a.m.?

b. What do you think happened at 10:15 a.m.?

2. **a.** During which hour of the morning were the oranges selling the most quickly?

b. Make some computations to show that your answer to part **a** is right.

c. How could you show that your answer to part **a** is right, by just using the graph without making any computations?
