# Birthday Cupcakes

Mr. Ramon wants to buy cupcakes for his son Jaime's birthday party at school. The cupcakes are sold in boxes; each box has either 6 chocolate cupcakes or 6 vanilla cupcakes. There are 27 students in Jaime's class.

1. What is the **least** number of boxes that Mr. Ramon should buy, if each person will get only one cupcake? Show how you find your answer.

---

---

---

2. Will there be any extra cupcakes? If so, how many?

---

---

---

**Extension:**

3. What is the least number of boxes that Mr. Ramon should buy, if each person will get one chocolate **and** one vanilla cupcake? Tell how you get your answer.
